SUMMARY

Full Stack Software Developer with 4+ years of experience building production React applications and scalable backend APIs. I've worked closely with product and design to ship user-facing features, while also building cloud-based services on AWS and Azure. I focus on clean, maintainable UI, performance, and reliability, and I enjoy working in fast-moving startup environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer

St John's, Canada

Weevva Systems

05/2025 - 01/2026

- Designed and maintained scalable full-stack applications with AI-driven features, improving automation throughput and reducing manual workflows by roughly 20%
- Developed and optimized APIs, data pipelines, and model-inference services using FastAPI and PostgreSQL, cutting average response times by 30-40% under peak use
- Improved end-to-end model efficiency through optimization and monitoring, reducing inference latency from 250ms to 120ms in production
- Built and maintained front-end features with React, Next.js and TailwindCSS, increasing engagement on AI-powered UI components by 10-15% based on usage analytics
- Built and integrated backend services using JavaScript/Node.js and Python to support AI-driven workflows and cloud-based deployments on Azure

Software Engineer

Pune, India

Msys Technologies

04/2020 - 12/2021

- Developed data integration solutions using Ruby, reducing audit times by 40% and streamlining compliance processes
- Designed and managed cloud-based applications using Docker and CI/CD pipelines, achieving a 30% increase in scalability and a 20% reduction in operational costs
- Created Ruby cookbooks to oversee security compliance controls, improving system reliability by 12%
- Trained and mentored four new hires in a remote environment, earning the Performance Excellence Award (Q3 2021)

Associate Software Developer

Mumbai, India

Allerin Technologies

06/2018 - 03/2020

- Directed the development of web applications using Ruby on Rails, CSS, HAML, and JavaScript, enhancing codebase maintainability by 15%
- Enhanced the responsive behavior of web pages by utilizing jQuery for DOM manipulation and event handling, implementing A/B testing, resulting in a 40% increase in user engagement and a 16% boost in customer retention
- Increased data processing efficiency by 17% through SQL optimizations, including indexing and query tuning
- Automated testing with RSpec and Jupyter, achieving 95% test coverage, reducing defects, and ensuring high-quality deployments

SKILLS AND COMPETENCIES

- **Programming Technologies:** Python, JavaScript (Node.js), Next.js, SQL, Ruby, Java, C, C++, HTML, CSS
- **Libraries/Frameworks:** FastAPI, Django, Ruby on Rails, React, React Native, Next.js, PyTorch, TensorFlow
- **Data & ML:** Model training, inference optimization, data pipelines, A/B testing, monitoring
- **Tools:** Git, Docker, AWS, Azure, PostgreSQL, Redis, Linux, JIRA, Vite, Sidekiq
- **Development Practices:** Agile, TDD, CI/CD, modular architecture, performance profiling
- **Soft Skills:** Problem-solving, Collaboration, Clear communication, Adaptability

EDUCATION

Master in Applied Science, Computer Engineering

St John's, Canada

Memorial University of Newfoundland

01/2022 - 10/2023

Bachelor in Engineering, Computer Engineering

Mumbai, India

Mumbai University

06/2014 - 05/2018
